

Caring for you so you can care for others

Meeting your Home and Community-Based needs now and into the future

Pavillio has your 245D requirements covered and more

HCBS billing ease

Pavillio makes it easy to review and approve billing for unit based and daily services for in-home and residential-based care regardless of the payor. The fully automated billing means 99% accuracy on payments and no more remits to manually reconcile.

Full featured EVV app

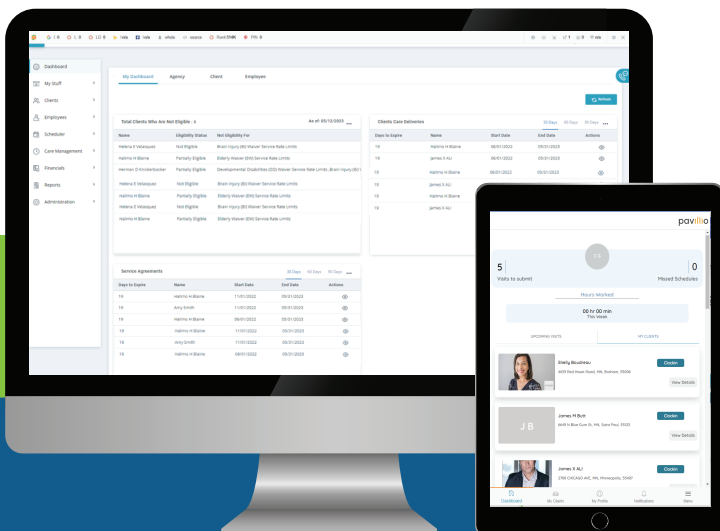

With more than 50,000 EVV users across, our field-tested mobile app is designed to meet EVV compliance needs. In addition to compliance, caregivers have come to love the ease of use and instantaneous access to information.

Advanced eMAR

Starting in August 2023, Pavillio users will be able to eliminate paper MARs and step into an eMAR. Allowing users increased comfort with accurate med setup and administration with drug data, medication reminders, missed med tracking and fully integrated pharmacy capability.

“ I loved that everything was so convenient! It was very user-friendly and it really helps when a lot of our providers aren't super tech savvy. ”
